

The all new
Piezo Switches

Introducing

The new line of Piezo switches from Bulgin. They are designed to withstand the harshest of environments. Unlike traditional switches, Piezo switches have no moving mechanical parts making them extremely durable, withstanding millions of actuations and requiring little to no maintenance.

- Available in aluminium or stainless steel construction
- Momentary and latching functionality
- Ratings 24volts, 1 amp
- Diameter sizes ranging from 16 - 22mm
- Multiple illumination options available

Why Choose Piezo?

Extremely long life operation.
(millions of cycles)

Completely sealed from the environment making it weather and waterproof.

One piece construction.

Strong resistance to physical impact and knocks.

Able to operate in extreme temperature environments
(-40° to +85°C)

Usage through gloves and with overlays possible.

Applications...

Heavy Industrial
Oil & Gas
Mining
Machinery automation

Marine
Boating equipment
Jet Skis
Dashboards
Diving equipment

Consumer Tech & Electronics
